

The Disciplined Agile Delivery Experience Workshop

Disciplined Agile Delivery (DAD) is an IT process decision framework for delivering sophisticated agile solutions in the enterprise. It builds on the existing proven practices from agile methods such as Scrum, Extreme Programming (XP), Lean software development, Unified Process, and Agile Modeling to include other aspects necessary for success in the enterprise. DAD fills in the gaps left by mainstream methods by providing guidance on how to effectively plan and kick start complex projects, as well as how to apply a full lifecycle approach, with lightweight milestones, effective metrics, and agile governance.

This three-day workshop is not technical and is suitable for all team members. Many group exercises reinforce the principles learned. The workshop is also valuable for management tasked with moving from traditional approaches to agile.

Learning Objectives:

- < Avoid costly agile adoption mistakes by starting with a full delivery lifecycle.
- < Learn how all aspects of software delivery – architecture, design, testing, programming, leadership, quality assurance, data administration – come together in a cohesive whole.
- < Discover how to tailor your agile process to reflect the actual situation you find yourself in.
- < Gain hands-on experience with agile solution delivery techniques.

Audience:

This course is intended for:

- < IT practitioners new to agile who want to get an effective start at agile solution delivery.
- < Existing agile practitioners who want to take it to the next level
- < Senior IT management who want to gain a deep understanding of how to take a disciplined approach to agile solution delivery
- < Agile practitioners who intend to take the certification exam for Disciplined Agile Yellow Belt or Disciplined Agile Green Belt

Pre-requisites:

Basic concepts of agile methods such as Scrum are useful, but not required.

Duration:

3 days

Outline:

- 1. Introduction to Disciplined Agile Delivery (DAD)**
- 2. Agile Foundations**
- 3. Forming DAD Teams**
- 4. Inception Phase: Initiating a DAD Project**
- 5. Construction Phase: Building the Consumable Increments of your Solution**
- 6. Transition Phase: Releasing the Solution to your Stakeholders**
- 7. Adopting DAD**
- 8. Governing DAD Teams**
- 9. Summarizing the Workshop: A Retrospective**
