Rational Team Concert (RTC) for Project Managers

This training course introduces participants to the breadth and depth of managing a software development project using Rational Team Concert (RTC).

Objectives:

- < Familiar with Rational Team Concert process templates and project plans
- < Upon completion of this course the student will be able to:
 - a. Understand Project and Process Concepts
 - b. Review RTC Process Templates
 - c. Understand Project and Team Membership
 - d. Establish Project Timelines and Iterations
 - e. Define Work Item Categories
 - f. Create a Project Area and Team Area(s)
 - g. Create Project Plans
 - h. Assign Work Items to Plans
 - i. Monitor Plan Progress

Audience:

Project Managers using Rational Team Concert, as well as Development Leads responsible for managing projects using RTC.

Prerequisites:

IconATG's training class, "RTC for Contributors" or hands-on RTC experience is highly desirable, but not required.

Duration:

1 day; course can be customized depending on your end users specific needs.

Outline:

1. Introduction
 - Review course objectives and outline
2. RTC and Project Overview
 - Repository Connections
 - RTC Client Interfaces
 - LAB: Confirm RTC Connectivity
 - Project Area
 - Team Area
 - Work Item Categories
 - Process
 - Timeline, Iteration
 - Roles, Permissions
 - Process Behavior
 - Process Templates
3. Project Areas
 - DEMO: Create Project
 - Timelines and Iterations
 - DEMO: Timelines
 - Roles and Permissions
 - Access Control
 - E-mail Settings
 - DEMO: Assign Roles, Permissions, Access Control, and E-mail Settings
4. Project Teams
 - Project Teams and Team Organization
 - DEMO & LAB: Create Project Teams
 - DEMO: Work Item Categories and Team Association
5. Project Timelines
 - Project Iterations
 - DEMO: Create a Timeline
 - LAB: Create Iterations
6. Project Planning
 - Plan Types
 - DEMO: Create Plans
 - LAB: Create Team Plans
 - DEMO: Add Epics and User Stories to Product Backlog
 - DEMO: Allocate Stories to Release Plan
 - LAB: Project Release Plan
 - LAB: Define Sprint Backlogs
 - Planned Items
 - LAB: Explore Planned Item Views (Modes)
7. Monitoring Plans
 - Load and Progress Bars
 - Dashboard Widgets
 - Team Central / Dashboard View
 - My Work View - Personal Planning
 - LAB: Work Item Estimates, Estimate Corrections, and Remaining Time
 - User Profile: Availability
 - LAB: Maintain User Profile
8. Review
 - DEMO: Plan and Work Items Using the Eclipse Client

Note: Projects that already have RTC in use may benefit from a modified agenda to optimize training time. The instructor and project leadership may modify the agenda in advance.
